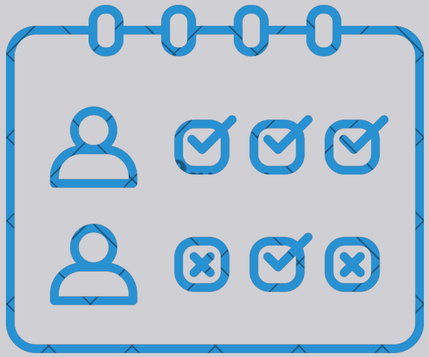
TRACKIFY

STAY ON TRACK, STAY ENGAGED!

Presented by: SYNC-FIVE

Problem Statement

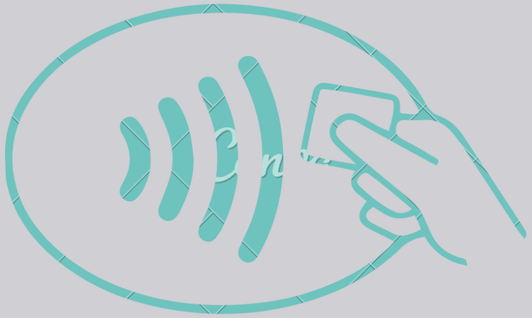


Manual attendance is slow and error-prone.

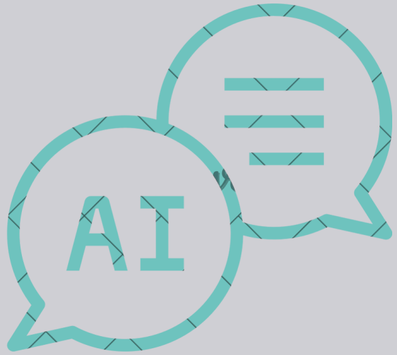
No real-time engagement tracking.

Limited attendance insights for educators.

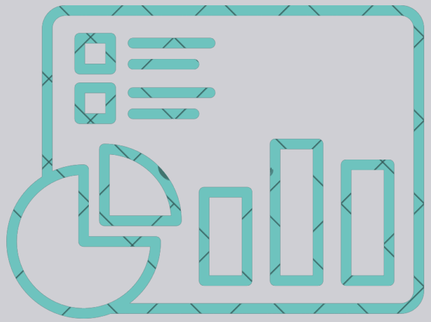
The Solution - Trackify



Automates attendance
(RFID or facial recognition.)



Engages students
(WhatsApp chatbot reminders.)



Simplifies operations
(Dashboards for professors and administration.)

The Technical Aspect

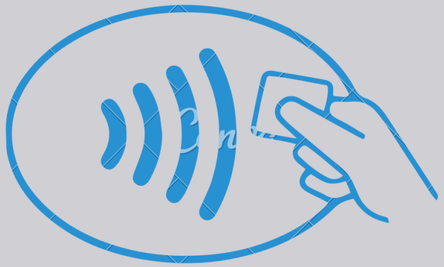
AI Model :

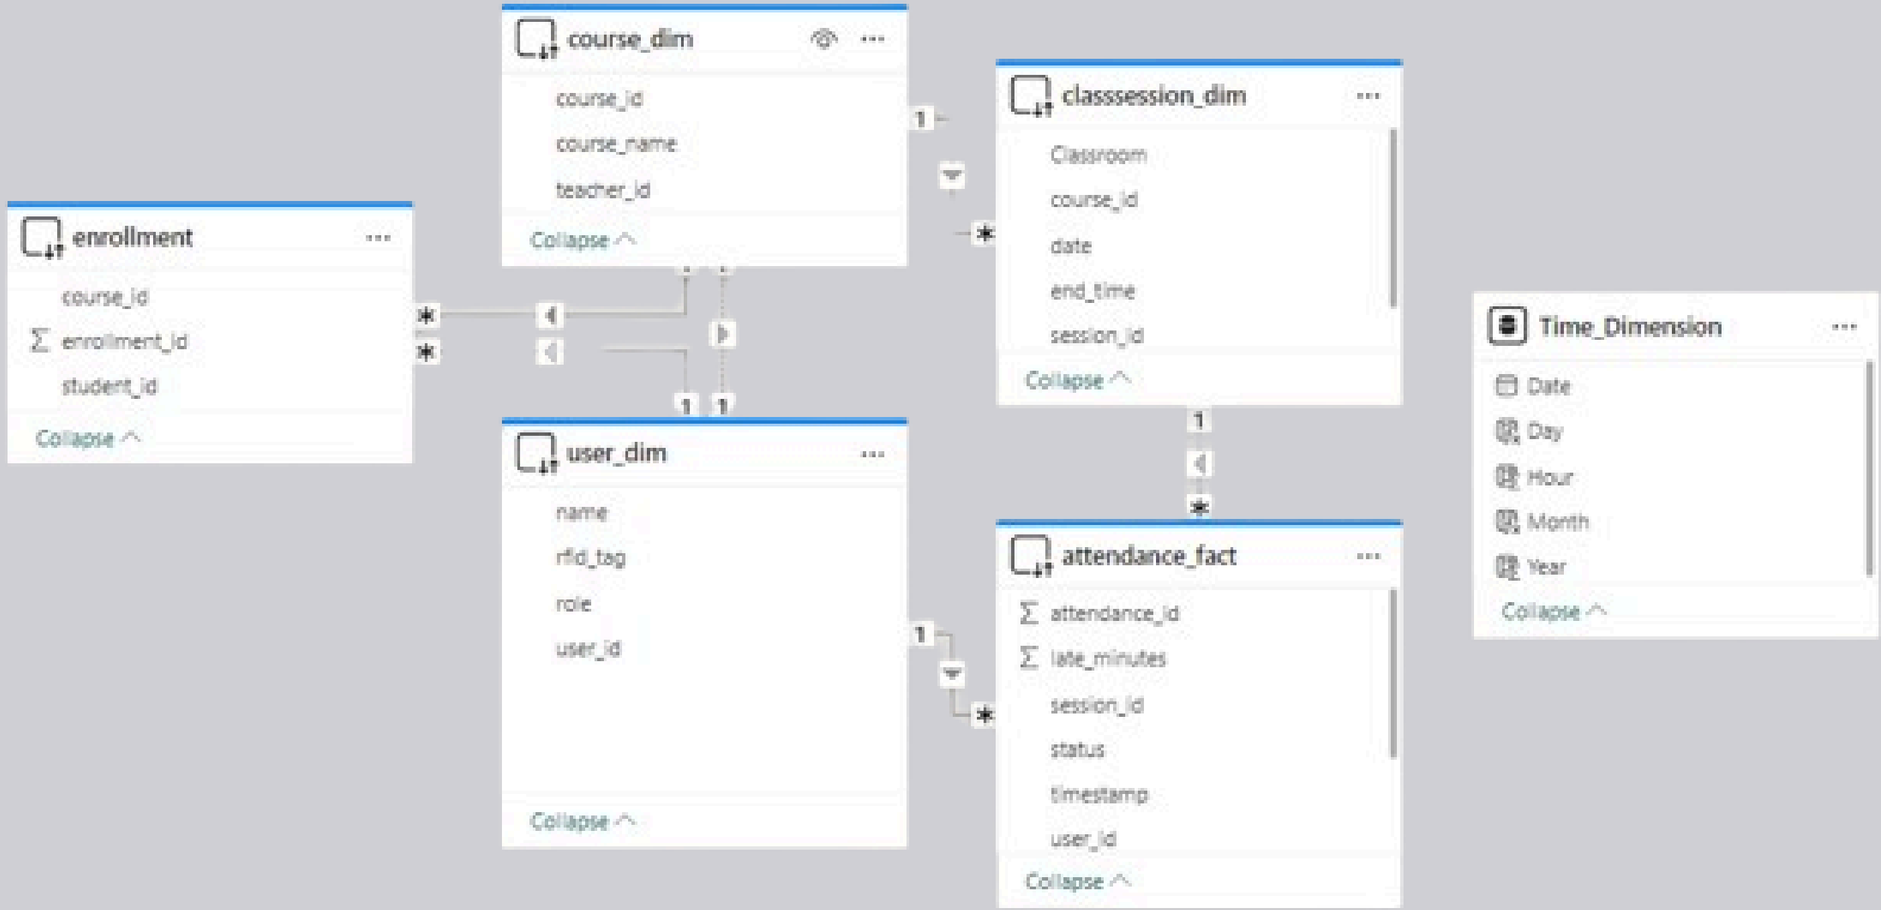
89%

Continuously improvable with additional training data.



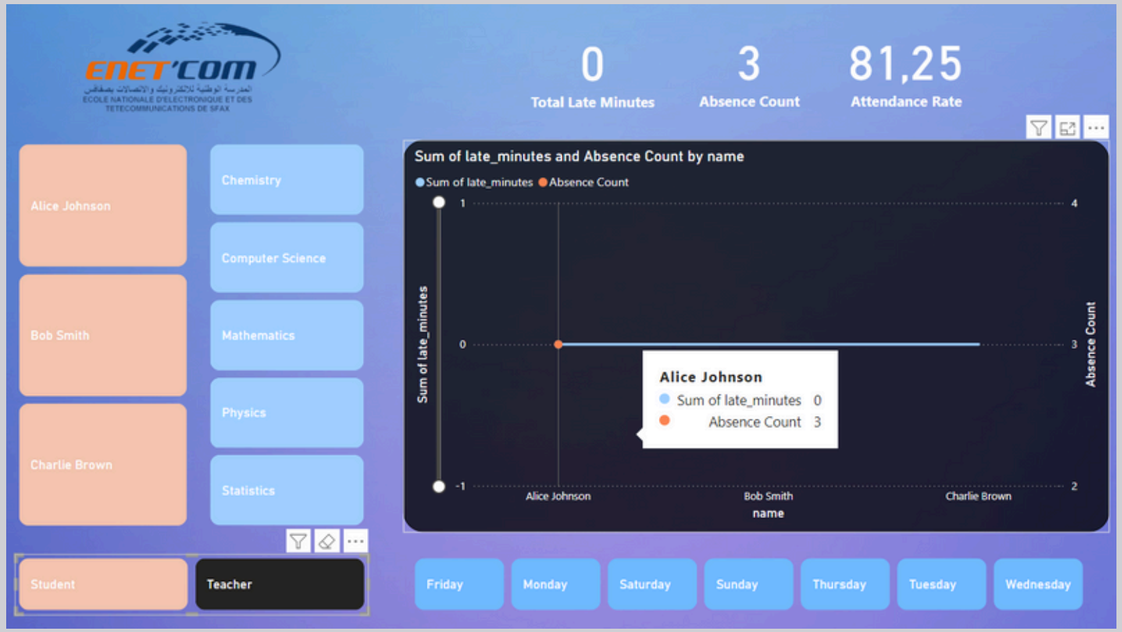
Minimizes disruptions and maintains class efficiency.

Database Design :



Dashboards :

Student Dashboard

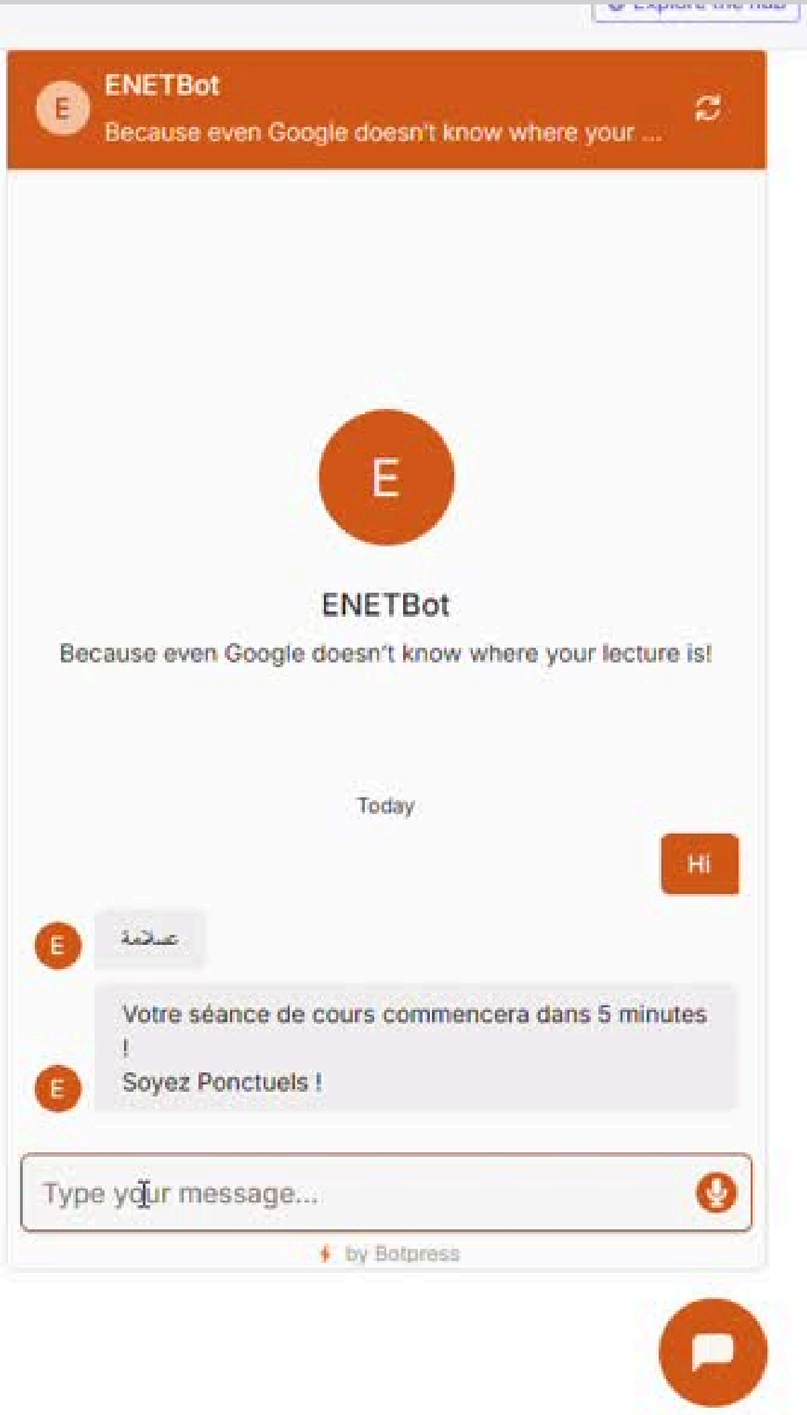


Teacher Dashboard

ENETBot :

Because even ChatGPT doesn’t know where your class is !

- **Personal Campus Assistant**
- **Sustainability Guidance**
- **Smart & Funny.**

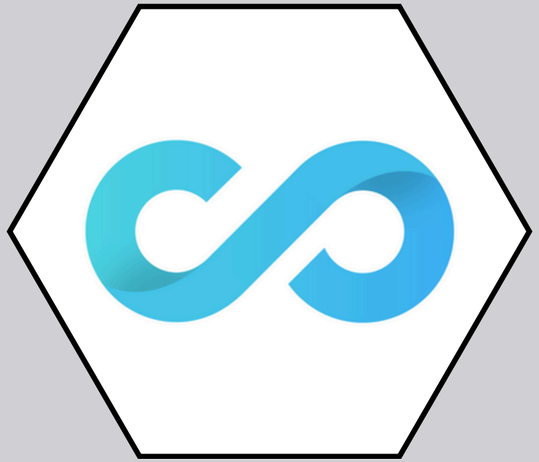


The Business Aspect

Benchmarking

Attendance solution with high costs and minimal focus on students.

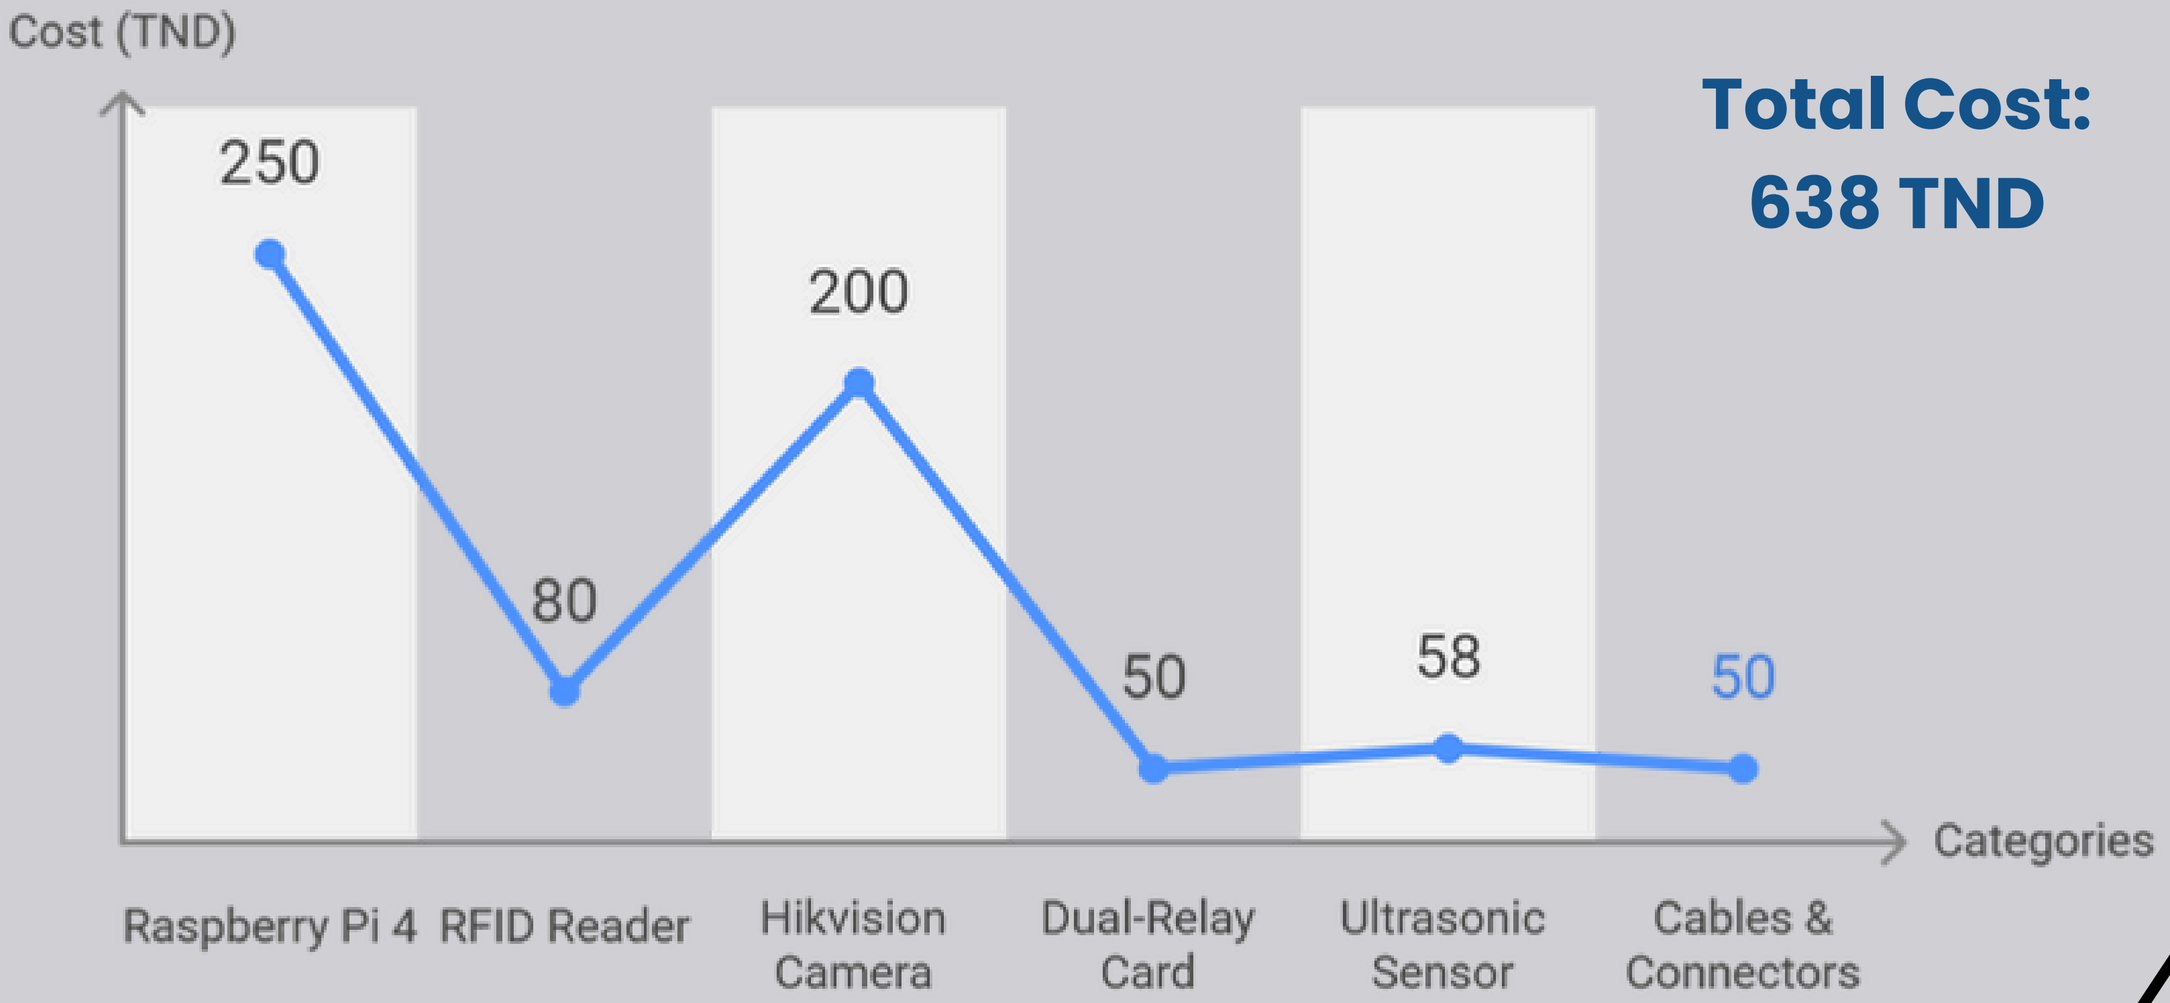
Employee-oriented time tracking, unsuitable for academic settings.



All-in-one platform, expensive and complex for institutions.

Metrics / Competitors	Cost	Engagement	Scalability
TimeClock Plus	High	Limited	Moderate
Buddy Punch	Moderate	None	Low
Connecteam	Very High	Generic Tools	Moderate
Trackify	Low	Advanced Dashboards	High

Cost Analysis :



Total Cost:
638 TND
